About Us

Architectural Design Associates (ADA) of Lincoln, NE, is the lead firm of the Design Team. ADA is a full-service architectural design firm established in 1989 as a Professional Corporation (P.C.). ADA has provided professional, client-focused architectural design services to diverse projects throughout the Midwest for over 30 years. We offer an extensive experience in a wide range of new construction, renovation and remodeling projects including Recreation/Sports Complexes, Educational Facilities, Industrial Complexes, Health Care Centers, Retail Establishments, Correctional Facilities, Institutional Facilities, Corporate/Office Buildings, Financial Institutions, Multi-Family Housing and Religious Buildings.

ADA's Principals and Project Managers David Wiebe and John Hathaway have carefully assembled a team of nine hard-working professionals, including five architects, one project manager, one architectural technician, one intern architect and an office manager. Their combined experience and personal attention make what could be an overwhelming design process enjoyable and rewarding. ADA is currently licensed to practice in the states of Nebraska, Kansas, Colorado, Iowa, Missouri, Oklahoma and South Dakota.

Our attention to detail and quality relationships keeps our clients coming back. We take great pride in the fact that many of our projects come from repeat clients:

- Lincoln Parks and Recreation Department
- Lincoln Public Schools
- University of Nebraska-Lincoln and Kearney
- Lincoln Police Department
- Union College
- Lincoln Water System
- Lincoln Fire and Rescue
- Peru State College

Their trust in us speaks to the quality of our work and focus on client service of our people.

At Architectural Design Associates our motto is simple: “It’s Your Project.” Our talented and attentive team asks lots of questions – and we listen to your answers. Your dreams, needs and goals guide our ideas and solutions from the initial concepts to the ribbon cutting. We get to know you and establish a comfortable working relationship – fostering mutual respect and open and honest communication. While our professionals bring a wealth of architectural experience to the table, we don’t bring preconceived ideas about what’s right for you.

Each member of our team will bring a set of unique and exceptional skills to your project. Our professionals understand the intricacies and specific characteristics that each type of facility demands. As with all of our projects, ADA will approach yours with an innovative eye, integration of technology, preservation of existing elements when desired, and attention to sustainability.

Once your project begins, we keep the conversation flowing with frequent communication— discussing evolving needs and offering design alternatives. And throughout the design and construction process, we make your job easier by serving as your representative to contractors, city and state code officials, and other consultants.

Using programs such as Autodesk® Revit® and Google SketchUp Pro® allows us to create 3-D digital models. These models let us illustrate and develop our ideas at a higher quality and depth. The models also let our clients explore and experience the project via perspective images, video walk-throughs, and virtual reality walk-throughs, allowing

them to make further input during the design and help avoid changes during construction.

Architectural Design Associates believes that quality is in the details. That’s why our building designs include sharp, aesthetically pleasing plans that are also practical and cost-effective to build. This attention to detail is reflected in the drawings themselves, which are meticulously created with a high level of precision and accuracy.

Contractors appreciate our detailed drawings because they allow jobs to flow smoothly – with fewer on-site challenges and changes. Clients, too, appreciate our expertise – knowing that quality drawings result in projects that are completed on time and on budget.

Our tradition of dedication, professionalism and outstanding client service is a testament to that mission as we strive each day for excellence in bringing our valued clients’ ideas to life in the constructed environment.

Our Firm

John Hathaway | AIA | Principal | Project Manager

John has served as the project manager and project architect on many successful projects with complex programs and challenging budgetary constraints. His ability to incorporate technically challenging building elements into existing and new structure displays an eye for detail that serves him well in project management. John utilizes strong communication and organization skills to maintain a pulse on the project from preliminary design through final completion.

YEARS OF EXPERIENCE

36 Years | 21 Years with ADA

EDUCATION

Bachelor of Science in Architectural Studies, University of Nebraska, 1985

Chris Pischel | AIA | Project Architect

Chris has 15 years of architectural experience working on a wide variety of projects, from remodels and renovations to new construction. Involved in all phases of the project, Chris is responsible for assisting with the development of preliminary design drawings, completing and assembling final construction documents and performing construction administration. He also works closely with design consultants and the owner. In addition to being proficient in the use of AutoCAD, Revit and Photoshop, Chris's excellent organizational ability has him in charge of managing the company archives of past projects as well as the company's digital content library.

Chris Northup | Project Manager

Chris joined ADA in July 2006, and has over 22 years of experience in architectural design and construction practices on a variety of projects. A few Addition and Renovation projects that he has been involved with over the years are Lincoln Orthopedic Center Addition and Renovation; Horizon Bank Addition and Renovation in Waverly, NE; Union College Physician Assistant Studies Renovation, TJ Majors IAQ Renovations at Peru State College and Goodrich Middle School in Lincoln, NE. Currently Chris is overseeing the Lincoln Surgical Hospital - ASC remodel and the Advanced Medical Imaging remodel and addition.

Chris is exceptionally versatile having spent parts of his career as an owner of a general contracting company, which gives him a unique perspective and understanding for our clients. Along with superior technical skills in preliminary design, construction drawings, writing specifications, estimating and managing projects through all phases of design and construction. Chris also has many years of experience as a consultant for commercial food service design.

Our Firm

Gregory Schepler | Intern Architect

Gregory has shown the ability to ably apply a strong sense of design and thorough research to help in the implementation of all areas of projects. His work at ADA includes: Lincoln Surgical Hospital - ASC Remodel, The Meadows Memory Care facility, Dental Designs, and various residential and commercial projects.

Gregory is passionate about design, how it can shape people's perceptions, and the unique opportunities of every project. He enjoys working with the client and design team to create the best possible project. Design is most successful with critical thinking and creativity, while keeping context and future generations in mind. Using the newest tools and a fresh design approach he has proven to be a crucial member to our project team.

Gregory graduated from the University of Nebraska - Lincoln with his Masters of Architecture in 2015 and is actively working on his professional AXP (Architectural Experience Program) with the final goal of becoming a Licensed Architect.

Geoffrey Childs | Project Architect

Geoffrey brings more than 25 years of experience and design acumen to the ADA team, with projects that span from his work with Walsh Bishop in Minneapolis, Minnesota to arCurectecture in Lincoln, Nebraska as well as time spent as an independent architect. His work has spanned major developments with companies like Marriott and Hilton while balancing simultaneous multi-project involvement. Through his career, he has gained experience as a consultant, project manager, team supervisor and member of design teams, all for expanding his skill and knowledge in the architectural field while designing progressive and quality oriented designs.

Geoffrey prides himself on his skill with both computer and hand drawn design tools to better serve his clients and realize a designs potential.

Dillon McLain | Architectural Technician

Dillon joined ADA in 2015 during an internship for completion of his Architectural Technology program. He has remained with us ever since. Dillon bring a strong level of technical proficiency to his work, as he helps our team leaders flesh out designs into final designs and built projects.

Jada Northup | Business Office Manager

Armed with an impressive business background, Jada is responsible for many duties at ADA – administrator, bookkeeper, account coordinator, administrative assistant, marketing manager and receptionist. She’s skilled in various computer programs, including Microsoft Office (Word, Excel, Publisher and PowerPoint) and Quickbooks Premier. Jada is also a General Notary in the State of Nebraska.

Continuing Care Projects

ADA

Tabitha Green House

4720 Randolph St, Lincoln, Nebraska

Tabitha Health Care Services requested ADA design a series of additional assisted living houses that match the style of their existing Green House together with the surrounding neighborhood.

Each added house functions as a stand-alone program; featuring 12 bedrooms with personal bathrooms, a Library and private rooms, a full kitchen and dining room, in-house staff offices, and meeting rooms.

Pinnacle Specialty Care

1223 Prairie View Road, Cedar Falls, Iowa

Care Initiatives requested a design for a new 100-Unit facility. The new facility featured a state of the art therapy center, beauty shop, large and small dining areas, and full service kitchen.

The facility is arranged in a wagon wheel with primary services and the dining areas at the center while residence rooms, amenities and the therapy centers are located along the wings.

Education Projects

ADA

Union College's Rees Hall

4810 Bancroft Ave, Lincoln, Nebraska

ADA's remodel of Rees Hall brought the building up to modern standards. The new space went through a complete reworking of the lighting system and new furnishings throughout the building to create a better study environment.

All the finishes in the building were updated while still maintaining key features such as the 60's style fireplace. The reception area was also updated to better serve the administration functions of the building.

Peru State College - Performing Arts Center

Peru, Nebraska

Peru State College requested a comprehensive renovation for their still original 1920 performing arts building. This entailed stripping the theater down to the shell and installing up-to-date sound, lighting and projection systems. The theater space was refurbished with new seating and acoustical panels. The existing entry hall and support spaces were demolished to provide larger facilities and a more spacious lobby.

On the exterior, the adjacent green space was developed into an event space and donor plaza. The project also incorporated Peru State's geothermal heating system with several additional wells installed under the event space for this project.

Financial Projects

ADA

Midwest Bank

2655 Jamie Ln, Lincoln, Nebraska

Midwest Bank approached ADA to design a bank that projects its own identity while still being recognizable as a Midwest branch location.

This was achieved through the use of different combination of stone, brick, tile and brushed aluminium finishes both inside and out, as well as altering the shape of the building with an additional floor.

Healthcare Projects

ADA

Lincoln Orthopaedic Center

Lincoln, Nebraska

In 2013, Lincoln Orthopaedic Center had outgrown their existing building and called on ADA to assist them with two building additions along with a complete remodel and update of the existing medical practice. The additions consist of an expansion of the post operation recovery areas to the east, and an expansion to the west side of the building including additional operating and procedure rooms, a new MRI scan room, along with doctor and business offices.

The project was challenging in many ways considering the need for the facility to remain in operation throughout the construction and remodel process over an 18 month schedule. The project was completed in 2015 within the not to exceed budget given by the owner.

Foot and Ankle Specialists

Bellevue, Nebraska

Foot & Ankle Specialists employed ADA to design their new home location west of Bellevue, NE. The new building, features three 'doctors' pods' each including a doctor's office, four treatment rooms and a nurse's station.

The facility's design provides a soothing environment for patients using the selected neutral color pallet and natural finishes throughout the space. In addition, ADA worked with the staff to design an efficient work environment, addressing the issue from their previous facility and providing adequate space in their new location.

Metal Building Projects

ADA

UNL Ashfall Pavillion

Royal, Nebraska

ADA was approached by The University of Nebraska to design the structure around the Ashfall Excavation Site. The combination of the steep grade around the excavation as well as the need to preserve its contents provided a unique challenge.

The metal shell and walkways cover 17,500 square feet allowing access for the public to experience the continued excavation of the site. As well as giving access to the archaeologists and volunteers that work on the site. The completed shell also allows for further excavative efforts to be conducted year round.

WOOF! Dog Care

1300 Infinity Ct, Lincoln, Nebraska

WOOF! Dog Care contracted ADA for their new full-service veterinarian clinic, canine day care and kennel facility. The 15,000 square foot building supports the variety of program elements, allowing clients and their dogs to enter the large vaulted atrium and have direct access to the offered services.

ADA worked hand in hand with the WOOF! staff to address concerns they had from previous locations. From the front entry area to the kennels at the rear of the building, natural light fills the interior from generous windows and clerestory openings, providing the animals and staff a better environment. The site was also leveraged to allow for a larger building, indoor gym and directly adjacent outdoor play areas helping the staff transition between the areas more seamlessly.

Municipal Projects

ADA

Lincoln Police Department Fleet Maintenance Building

100 Oakcreek Dr, Lincoln, Nebraska

The Lincoln Police Department selected ADA through the RFP process to design their new Fleet Maintenance facility. The building was designed as a remodel of an existing structure and an addition, on a site which required substantial work to mitigate flood plain concerns.

The functions include vehicle repair capabilities for all small City of Lincoln vehicles in addition to maintaining the Lincoln Police force vehicles. Additionally, office, waiting, body shop, and welding spaces were accommodated in the program. The facility included the integration of a commercial grade paint booth facility, vehicle exhaust recovery system, and bulk fluid distribution systems. The general building structure is a pre-engineered metal building addition to an existing block warehouse.

Raymond Rural Fire & Rescue

Raymond, Nebraska

ADA designed a much-needed new facility for the hard-working volunteers of the Raymond Rural Fire Department. The 15,800 square-foot structure features paired overhead doors that allow emergency rescue vehicles to drive completely through the facility.

The building includes offices, training room, locker room facilities, kitchen, storage, a file room and a decontamination/laundry room. A portion of the station was designed as a hardened storm shelter to meet FEMA F4 tornado requirements.

Office Building Projects

ADA

Firespring & Cornerstone Printing

1201 Infinity Ct, Lincoln, Nebraska

Firespring and Cornerstone Printing asked ADA to provide design services to renovate an existing space for a new joined office and warehouse facility.

The finished building provides room for both teams and projected future growth, using a flexible modular furniture system to emphasize core circulation to shared spaces.

The primary complexity of the project while meeting the needs and desires of both parties within a very tight budget. Despite the challenges, the end result is a dynamic, creative work environment that exemplifies ADA's attention to design.

The Viewpoint at Lincolnshire

7001 A St, Lincoln, Nebraska

Hampton Enterprises contracted ADA to design the flagship space for their Lincolnshire development, with special concern for seasonal weather. The ViewPoint office complex is composed of three floors on the areas high point, providing a stunning view to the Northwest, over central Lincoln.

The entry leverages the multi-floor layout to provide a spacious two-story lobby with high levels of southern daylight. The lobby is further enhanced with the added covered drop-off. The building also includes a secure, underground parking garage to serve both tenants and visitors.

Recreation Projects

ADA

Copple Student Athlete Development Center

7400 A St, Lincoln, Nebraska

Seacrest Field, Lincoln Public Schools premier sports field complex, was in need of an update to its field facilities. ADA was tapped to design the modern and well-equipped field house to service football, soccer, band competitions and other events.

The new field house includes two areas to accommodate home and visiting teams. Each side consists of an expansive training room with adjacent showers and toilet facilities. In addition, a moderately sized field vehicle bay was included to allow access to both the football and baseball fields.

Ed & Mary Copple
Student Athlete
Development Center

Boosalis Park Indoor Shooting Range

14703 N 44th, Lincoln, Nebraska

Nebraska Game and Parks and the city of Lincoln approached ADA to design a new building at Boosalis Park. As part of the development plan for the park, this new building would act as a unique combination of shooting range and education center.

Boosalis Park has long been the home of the Lincoln area's archery and trap shooting clubs. The aging outdoor archery range and lack of modern plumbing were noted on the Parks Department concern list.

ADA developed a plan to combine the remote campus shooting range with other offsite offices within the new building. The metal shell houses employee offices, configurable meeting rooms, a 30-yard indoor archery range and a 25-yard indoor shooting range. The new building provides onsite teaching space for both theory and hands-on classes as well as monitored all weather conditions.

Religious Projects

ADA

Indian Hills Community Church

1000 S 84th St, Lincoln, Nebraska

ADA created the design for the renovation for the auditorium in the Indian Hills Community Church. This renovation began with the removal of 30 year old pews and carpeting.

The updated look included installing 1,496 new seats, installation of new floor and wall finishes, reconfiguring the stage / platform area, designing a new orchestra pit, and installing state of the art sound, lighting and media systems.

Good Shepherd Lutheran Church

3825 Wildbriar Ln, Lincoln, Nebraska

ADA's design for Good Shepherd Lutheran Church in south Lincoln included both an education and sanctuary addition to accommodate a growing congregation. The education addition features nine classrooms, church and school staff offices, expansion of the multipurpose room, support spaces, an elevator and kitchen. The sanctuary addition includes the main worship area, overflow space and balcony.

A generous commons area joins the sanctuary and multipurpose room through vaulted ceilings and skylights. While working with a limited budget, ADA was able to make a bold statement with beautiful heavy timber trusses. A sound consultant and an organ designer were brought in to ensure a well-integrated state-of-the-art sound system.

ADA

Slim Chickens

84th & Old Cheney -- 16th & Pine Lake - Lincoln, Nebraska

ADA worked with the local owner of a new national Slim Chickens franchise on two new sites in southern Lincoln with possible future locations across Lincoln and even into the Omaha area.

The buildings were developed from a prototype layout but modified to fit constrained sites. Both locations were added to existing developments with standards for both clear distance between buildings and parking requirements.

Retail Projects

ADA

Westfield; Gateway Mall, Food Court Renovation

6100 O St, Lincoln, Nebraska

The Westfield Group selected ADA to relocate the Gateway Mall food court and design additional updates to the northwest side of the mall.

The new food court is a popular destination for shoppers, providing an open and airy commons area for seating and circulation.

The mall was in full operation during the project, so construction was carefully phased for minimum impact on tenants and customers.

Victorian Ridge Retail Center

5901 S 85th St, Lincoln, Nebraska

The Victorian Ridge Retail Center was designed by ADA to fill-out the development at the intersection of So. 84th Street and Old Cheney Road.

The larger space was dedicated to the owner's Tae Kwon Do training center, with three similarly sized rentable bays occupying the remaining volume.
